Ref. No. 2537/31-C1.

Station: Camp Ootacamund Dated the 5th August 1932

From (Name) R.D. Richmond Esq., C.I.E., I.F.S.,  
(Designation) Chief Conservator of Forests.

To The Secretary to the Government of Madras.

Development Department.

Si

In Government, Development, Memorandum No. 1823-I/  
30-2, of the 1<sup>st</sup> July 1930, the Chief Conservator was  
instructed to report cases or abuses of the concessions  
permitted in the reserved forests of South Kanara where  
such abuse is sufficiently serious to require a reconsi-  
deration of the general orders regulating the grant of the  
concessions.

2. The working of the concessions in 1930 was  
reported on, but as the Conservator had not had an

p 184/g 20: No  
x 1189 dec.  
10-6-30

fuller observations of his own when submitting the District Forest Officers' reports for 1931.

3. The reports for 1930 and 1931 with the Conservator's comments are now forwarded to Government.]

4. [It will be observed that] In North Mangalore the position was appreciably worse ~~than~~ in 1931 than in 1930. - in no fewer than thirteen reserves were the concessions "much" abused, and it is impossible for the subordinates to detect more than a small fraction of the abuses.

In South Mangalore the concessions are reported to have been "much" abused in one case and "to a fairly large extent" in nine cases. Both these definitions must be regarded as indicating a serious state of affairs as the exercise of the concessions in a regular manner inevitably results in grave damage to the forest.

The Collector has offered no observations in forwarding the 1931 reports, but on those for 1930 Mr. Wells wrote

omit "There is sure to be a hue and cry from the ryots if the concessions are stopped. I think, however, that the graded withdrawal of them as proposed by the District Forest Officer will be the only solution".

The Chief Conservator has nothing to add to the views he has from time to time expressed on the subject of these concessions generally. Their exercise, whether abused or not, spell complete ruin to the forests and, although there would result some good from the removal of evergreen undergrowth in certain of the reserves in the south of the district, such an operation cannot be carried out in this way.

7. There is no doubt that the orders should be reconsidered in respect of the twenty three reserves referred to <sup>above</sup> in paragraph 3 of this letter] though fair use of the concessions, as compared with their abuse, only implies that the forests where there is n

abuse will exist for a little longer than the others.

[ But as Government are possibly aware there has recently been a certain amount of civil disobedience in South Kanara and the present may not be an appropriate time at which to withdraw the concessions except on a moderate scale. ] The least law abiding people are those north of Coondapur and it is precisely here that the concessions are, and have always been, most abused. The District Forest Officer, North Mangalore suggests that withdrawals should commence inland and work towards the sea, where the demand is heaviest, the unreserves destroyed completely, and the abuses the most intense. This suggestion appears a sound one and it is therefore recommended that, for the present, the concessions in North Mangalore be withdrawn in the case of the six "much" abused reserves which lie farthest from the sea, and that the Veeracumba Reserve in South Mangalore be closed to the concessions.

some of the reserves. It is not possible for a single Guard to prevent such abuses in such a vast area of his beat. c

5. The subordinates detected 89 cases of abuse of concessions in Coondapur range, 12 in Shankaranaraina Range, 7 in Udipi Range and 9 in Mangalore Range, not to mention of the very many undetected cases of abuse of concession.

In conclusion I beg to point out that the drain of green leaf manure from all the Reserves especially the coast reserved forests of Coondapur range is so great that a time will soon come when they cannot support this indefinite demand and the only solution opened to the Forest Department is to close one reserve after another in gradual succession, so that the ryots may not feel the pinch all on a sudden.

N.Dis. No. 2255/31, dated 6-3-1931.

Forwarded.

There is sure to be a hue and cry from the ryots if these concessions are stopped. I think however that the gradual withdrawal of them as proposed by the District Forest Officer will be the only solution. I base this opinion on the facts stated by him.

Sd. G.W. Wells,  
6-3-1931.  
Collector of S. Kanara.

Statement showing the extent to which the Concessions allowed in the Reserved Forests of the North-Mangalore Division were availed of and abused during the year ended 31-12-30.

| Name of Reserve. | Are the Concessions availed of. | Extent to which a concession is availed of (State here nil, very little, a little or a fairly large enjoyment). |                  |                           |                       | If the Concessions have been availed of have there been abuses much or little. | What sort of abuses destructive methods of cutting of unclassified trees, cutting of trees that are not on classified or both. |

Westmative methods of cutting of unclassified trees & cutting of trees that are not unclassified.

Copy of Ref. C.1-496/31, dated 19-2-1931, from the District Forest Officer, South Mangalore, to the Conservator of Forests, VI Circle, through the Collector of South Kanara.

I submit my report on the working of the above concessions for the year 1930. The concessions allowed are the following:-

- (1) Clearing of undergrowth in all reserves (except Muliar, Kalanjimale and Veerakamba) to a distance of half a mile from the limits of private holdings.
- (2) Clearing of undergrowth in Muliar, Kalanjimale and Veerakamba to a distance of 200 yards from the limits of private holdings.
- (3) Clearing of undergrowth in all areas sown with Hopea.
- (4) Free removal of:-
  1. Green manure leaves of unclassified species and dry leaves of all species and.
  2. Dead fuel,

2 4 During the year in question the following cases of the abuse of these concessions were reported.

|                   | No. of cases<br>in violation<br>of concession. | No. of all<br>other<br>offences. | Total. |
|-------------------|------------------------------------------------|----------------------------------|--------|
| Kasaragod Range   | 39                                             | 44                               | 83     |
| Puttur Range      | 47                                             | 5                                | 52     |
| Uppinangady Range | 13                                             | 24                               | 37     |
| Beltangadi Range  | 8                                              | 18                               | 26     |
| Total             | 107                                            | 91                               | 198    |

The above cases related to removal of green leaves of prohibited species. The above are only the reported cases, and there will be a large number of undetected cases of these abuses. Last year there were 133 cases of abuse against 107 of this year.

3. At the outset, I may have to state that the grant of these concessions was a mistake. It is found difficult to stop the abuses. Lopping of branches of all species has become a hobby. Often it is found that small poles of valuable classified and reserved trees and branches of trees are cut and left in the forest and removed afterwards as dry fuel. Ryots are afraid of carrying billhooks and other cutting implements inside reserved forests before the grant of these concessions. Now they enter the forests with tools without any fear under cover of these concessions.

4. From what I have seen so far in this district, my impression is, that even long before these concessions were granted, the people were removing the leaves of valuable species, chiefly Terminalia tomentosa and Terminalia paniculata<sup>la</sup>, stealthily from the reserved forest. As a rule they do not go to reserved forest for the leaves of shrubs and less valuable species. This they get from the kumaki land and unreserves. I do not know why they insist on getting the leaves of valuable tree species. By the grant of these concessions they fearlessly enter the reserve for stealing the leaves of valuable species and it is 100 to 1 they are not caught. I have my own suspicion that to some extent at least our Forest Guard connive at this.

5. If we stop the concessions now there will be a hue and cry from every quarter.

6. By the protection from fire and unlimited grazing our valuable deciduous forests are being invaded by valueless evergreen undergrowth which prevents natural reproduction of deciduous species. If we encourage the people to cut and remove these evergreen undergrowth I do not think the Department will lose anything. If our Guards are made to do honest work in preventing the lopping of valuable species and if the superior officers of the Department check the work of the Guards more thoroughly I think it will be possible to minimise the danger. So my present recommendation is that the concessions may not be withdrawn at present because

these are being abused. I shall see what is possible to  
improve matters. I <sup>must</sup> cannot have some more time to give a  
definite opinion.

-----  
N.Dis. 2040/31, dated 28-2-1931.

Forwarded.

Sd. G.W. Wells,  
28-2-1931.  
Collr. of South Kama ra.

Copy of letter No. M. 119/32, dated 12-2-1932 from the Conservator of Forests to the Chief Conservator of Forests.

I submit herewith copies of references of the District Forest Officers, North and South Mangalore (Ref. C.No. 2630/H.31/C.1, dated 23-1-1932 and D.Dis. No. 254/32, dated 27-1-1932) containing their reports on the working of the forest concessions in South Kanara for the year 1931.

2. We know that the concessions hit parts of Mangalore North much harder than any in Mangalore South. I would wish the reports themselves to be read. (They are short and do not attempt a 'warm up' of the whole subject). Mr. Matthew, the District Forest Officer of Mangalore North says there is no improvement in the conduct of the villagers. Mr. Padmanabha Pillai, District Forest Officer, South Mangalore, thinks the abuses were not so bad as in the previous year.

3. 269 cases relevant to the concessions were detected during the year under report against 224 reported last year. I hesitate to draw conclusions from this variation.

4. A report on concessions was to be submitted by me early in 1932. Owing to the relative shortage of Travelling Allowance during 1931-32, and the demands of other divisions for my attention, I did not undertake a tour in South Kanara with the special object of studying the concessions, (Vide your Ref. No. 2537/31-31-1, dated 25-3-1931). I shall do a limited tour in both Mangalore North and South in the whole of March, with however the main object of dealing with new working plan introduction, and the sleeper fellings in unreserves. If anything significant relative to the concessions comes to notice I will of course report it: but the northern coastal areas are right off my track.

5. It is not long since the Honourable the Law Member toured this tract; and no doubt he has a first hand information

acquaintance with the subject of concessions. Personally I regret this legacy from a period of impulsive administration. Mr. Matthew rightly remarks that protection and "concessions" cannot go hand in hand. Only an optimist or a cynic would give a child the run of a jam cup board and say "Do not abuse this concession! (For if you do, I do not know what I shall do about it)".

6. The concessions are subversive of discipline where villagers and forest employees are concerned. A demoralisation is the outcome, and it cannot be confined only to localities in which the concessions operate. The concessions have undone the work of years: and will gradually spoil the forests.

I would rather divert from ordinary protective purposes tracts of Reserve where it can be stated (by those whose department it is to understand the needs of the cultivators) that the people must have access to leaf manure, than go on with the present order of things. I do not however recommend impulsive doctoring.

Copy of letter from the District Forest Officer, South Mangalore , D.Dis. 254/32, dated 27th January 1932.

-----

I submit my report on the working of the concessions for the year 1931. The following are the concessions allowed:-

- 1) Clearing of undergrowth in all reserves (except Muliar, Kalanjimale and Veerakambha) to a distance of half a mile from the limits of private holdings.
- 2) Clearing of undergrowth in Muliar, Kalanjimale and Veerakambha to a distance of 200 yards from the limits of private holdings.
- 3) Clearing of Undergrowth in all areas sown with Hopea.
- 4) Free removal of
  - (1) Green manure leaves of unclassified species and
  - (2) deal fuel.

2. I enclose herewith a statement showing to what extent the concessions were availed of in each of the reserves and the extent to which there was abuse if any.

So far as Uppinangady Range is concerned there seems to be no great abuse. The reason is not far to seek. The Range contains a large extent of unreserve lands for the ryots to supply their wants of agriculture.

In Kasaragod Range, the ryots have availed themselves of the concessions to a fairly large extent. The abuse was found most marked in Mandakole and Kannadka reserves, but the Range Officer reports that with timely warnings and holding of meetings in the villages it has come down a good deal during the latter half of 1931.

In Beltangady Range there was very little abuse.

In Puttur Range, it will be observed that Veerakambha reserve is the most troublesome one. It is surrounded on all sides by populated villages with agricultural lands. It is rather a difficult affair to control the activities of people here in this respect.

3. The total number of offences relating to the concessions is 114 against 107 reported last year, but the number of cases is not the only criterion for judging the extent of the abuse. The Range Officers reports show that generally the abuse was less than when compared with last year. I agree with them.

4. I do not recommend the withdrawal of the concessions for this year. The present time is not propitious for it. I am taking care to see as far as possible that some good is derived out of this bad job.

5. I have insisted upon the Range Officers to see that they encourage people to cut and remove the evergreen undergrowth which prevent the natural reproduction of deciduous species.

Statement showing the concessions availed of and abused in the several reserves during 1931 in South Mangalore Division.

| Name of reserves. | Have the concessions been availed. | Which concession and to what extent availed of. | Abuse much or little | What sort of abuses. | No. of offences since 1-1-31. | Remarks |

Ref.on C.No.2630/F.31-C-1.

Office of the Dt.Forest Officer,  
North Mangalore,  
Mangalore, dated 23rd January 1932.

Office Note.

From

K.T.Matthew Esquire, B.Sc., I.F.S.,  
District Forest Officer,  
North Mangalore.

To

The Conservator of Forests,  
Sixth Circle, Ootacamund.

Through

The Collector of  
South Kanara.

Subject:- Forests - South Kanara Concessions - Report 1931 -  
submitted.

Reference:-Your Ref.No.768/31, dated 19-5-1931.

In continuation of this office ~~Ref.No.2630/F.31-C-1,~~  
1-32, I submit herewith a statement showing the extent to  
which the ryots in North Mangalore division availed themselves  
of the concessions granted to them in the Reserved Forests and  
also the extent to which the ryots abused the concessions during  
the year 1931.

2. It will be seen from the statement that the r  
the destructive methods of cutting of unclassified species and  
cutting of trees that are not unclassified for the collection of  
green leaf manure and fuel.

3. The concessions were greatly abused in all the coast  
reserves of Coondapur Range as Sarpanamane, Savantagudde, Kadike,  
Baindur, Guruvankote, Karnigudde, Kursegudde, Darelgudde, Harkur,  
Honnukodlu, Chittur and Mudaregudde.

In the following reserves of Udipi Range, the conce-  
ssions were abused:-

Nire, Vorwadi, Andar, Jatkatmale, Jarvathu, and  
Mavinakodlu.

They were not abused in the following reserves for the  
simple reason that these reserves are inaccessible and the

villages near there are thinly populated:-

Coondapur Range. Haramannupare, Gundaberu, Jennalane, Korakoppadahola, Murkodihola, Hullumurdibare, Madibare, Meganivalley, Mensinagudde and Hannarmagne.

Shankernaraina Range. All the reserves except Mavinaguli reserve.

Mangalore Range Hurabe and Nananjimala.

In the remaining reserves, the abuse of the concessions was very little. In removing the leaf manure a large percentage has been at the expense of the classified species.

4. No appreciable improvement is noticeable in the conduct of the villagers in making use of the concessions. They do not seem to make any distinction between unclassified, classified and reserved species. They collect whatever is handy to them and trees with lopped branches are a common sight, in some of the reserves. It is not possible for a single guard to prevent such abuses in the vast area of his beat. Protection and -- concessions cannot go hand in hand.

5. The subordinates detected 115 cases of abuse of concessions in Coondapur Range, 1 in Shankernaraina Range, 18 in Udipi Range and 21 in Mangalore Range.

Sd/- K.T.Matthew,  
District Forest Officer  
North Mangalore.

District Muziris

(Sd),

K. T. Matthew  
District Forest Officer  
North Malabar.

Copy of letter Ref.No.M. 119/32., dated 28th March 1932  
from the Conservator of Forests, Sixth Circle, Ootacamund.  
to the Chief Conservator of Forests, Madras.

[Ref: Your Ref.No. 2537/C1/31, dated 4th March 1932  
Subject: Forest concessions - South Kanara - report on] *13-14 April*

[In continuation of my Ref.No.A.119/32 dated 12-2-1932]  
I have talked to the District Forest Officers, Messrs.  
Matthew and Padmanabha Pillai, about the "concessions"  
during my present tour in South Kanara; and have also  
seen places where they are a serious consideration in the  
two divisions. [I hoped to be able to write my conclusions  
in a half half page; but regret it could not be done.]

2. About 4 years ago I wrote very fully about the  
concessions: past history prior to 1924: the association  
of panchayats with concessions etc: details of "abuses"  
in the several reserves: our 1927 negotiations with the  
populace of the coast near Baindur, in search of expedients  
acceptable to both sides: conclusions that were reached:  
action taken etc., There is nothing whatever to correct  
in that report of 1927; and the information on almost every  
aspect of the concessions is there.

[3. The report may not have achieved my purpose because  
it was too long and painstaking. Conviction too may have  
seemed lacking, in the proposals I made, (after merely  
a fortnight's acquaintance with the matter).]

4. I reported then that the practice in force would in  
time (30 years were suggested) ruin the reserves, in the  
same manner that the unreserves had already been ruined.

[I could not comprehend then, (and I cannot still) why  
specially South Kanara country people should have free  
manure for cultivation and free fuel; (why should not the  
tax payer provide them with free seed too?): that the  
remedy was to have localised - but not free - fellings, if

manure leaf must be made available for the people of any particular places.

Now as regards present day opinion:-

[Mr. Matthew] District Forest Officer of North division, after about 2 years' experience, thinks that the concessions should be withdrawn: ~~for~~ for one reserve, then after a pause, for another, untill all are closed. He would begin inland behind Baindur Reserve and work outwards. He points out as an example that the Herur Reserve was closed by you in 1928. An extra Guard was put on (with a gun). There has been good protection and no trouble at all.

I think there is something to be said for his view. If there are places which really need special provision to be made then the fact would become evident and we should have leisure in which to make arrangements. Incidentally, if we devote any area to leaf lopping, it will be inadvisable to cling to distinctions between classified and unclassified trees. Such distinctions are not controllable in forest, which is different to a factory yard.

6. [Mr. Padmanabha Pillai] District Forest Officer, South Mangalore division also with nearly 2 years' experience here regards localised fellings, - confined to a fixed annual open period or periods in which we could put on extra supervision - as a workable expedient for those few places in his division that need any such provision. Elsewhere private forest and unreserves and Kumaki forests are so abundant that there is no reason for concessions.

7. The little private "hadies" that one sees in North Mangalore everywhere, (with masses of foliage; even now in April are evidence how very easily any land holder can by simply putting up a protective mud wall grow trees and provide for his own requirements, if he likes. The ordinary cultivator (in the hands of a landlord) will prefer free supplies from Reserves. The vociferous people at Baindur are land lords, incidentally, and not cultivators. [Vide my report of 1927 Ref.No.M.1709/27 dated 16th Decr. 1927.]

8. I have already forwarded the reports of the District Forest Officers. They indicate that in the way of abuses and breaches of Forest Law North Mangalore goes on disregarding rules just as usual, whilst in the South division abuses in some places had abated considerably. In the South division I was shown one place where there were no fresh abuses, but plenty of marks of 18 months old offences. Where there had been this improvement, it was due to personal efforts by the District Forest Officer ~~to~~ who interviewed communities himself. But elsewhere similar efforts had failed utterly. For example in Virakhamba Reserve.

9. Both District Forest Officers say how demoralising it is to subordinate staff to have unworkable rules to enforce.

10. The notification that is issued to the public annually runs as follows:-

"It is hereby notified for the information of the public that the Chief Conservator of Forests, Madras, in his order Ref.No.152/29; dated 20th Dec. 1929, has been pleased to continue the following concessions to ryots of the South Mangalore division from 1st January 1930 to 30th June 1930, in all the reserved forests of South Mangalore division. The concessions are given on the understanding that if they are abused, they will be withdrawn.

Concessions.

(a) Clearing of undergrowth in all reserves (except in Muliyar, Kalanjimale and Virakhamba reserve of South Mangalore division) to a distance of half a mile from the limits of private holdings.

(b) Clearing of undergrowth in Muliyar, Kalanjimale and Virakhamba reserve of the South Mangalore division to a distance of 200 yards from the limits of private holdings.

(c) Clearing of undergrowth in all ~~of~~ areas sown with

Also in  
North Mangalore  
p 36 mfr

(d) Free removal of

- (1) green manure leaves of unclassified species and dry leaves of all species and

- (2) dead fuel.

Note: (1) These concessions will be limited to the use of produce in the village limits from which the produce is taken.

(2) The word "undergrowth" noted above is defined to mean "growth of unclassified species not above six feet in height" and the words "dead fuel" to mean parts of dead trees less than three inches in diameter."

(The above refers to ~~South Mangalore division~~: Similar notifications are published in North division:)

11. Taking points in the notice:-

(a) (b) and (c) Clearing undergrowth: - the idea is to do away with shelter that harbours wild pig or other enemies of field crops. I have not seen this available of anywhere, and nor have the District Forest Officers. That is to say, there are small patchy clearances of undergrowth (for example near Mandekole village) but they were done to get leaf manure, and not to keep the wild beasts away.

12. Observe the footnotes, limiting the rules:

Note (1) the produce is to be "used" - may not be sold? or may it? - in the village limits only. Actually the destination of what is being collected is not ascertainable in the forest. Outsiders would say they were helping a local man to collect his leaf litter and we could not intervene. Outside the forest the destination of the produce cannot be interfered with or checked unless an elaborate permit system is set up. We see big boat loads of leaf being brought down the river from up country forest (origin uncertain) for sale in Coondapur.

13. Note (2). "Undergrowth" is limited to small stuff under 6' high; and "dead fuel" is part of a dead tree and

below 3" diameter.

But the principal catch in the rules as notified is that rule (d) does not impose any limitations on how "green leaf manure" may be cut. We all know what is understood by leaf manure: it has not been picked, leaf by leaf; but consists of lopped branches with leaves adhering.

There is nothing in the published notice limiting the height at which unclassified trees may be lopped; or the size of the branches that may be hacked off. Provided the cutting is alleged to be for leaf manure, all is well. Consequently a reserve is liable to become a dead fuel factory. The cooly hacks down a small tree or a big branch, and spreads the branches about the ground. He is "cutting leaf manure". In a few days he can return; and then (gathering up the fragments) he is "collecting dry leaves, or dead fuel".

~~14.~~ As a matter of fact the futility of making exact specifications for such matters for the benefit of care free coolies, boys, ~~and~~ women and children has no doubt been before the eyes of whoever framed the rules. But the result is sadly evident when you inspect a reserve where these concessions are worked for all they are worth.

~~15.~~ Take for example Sarpanamane Reserve, north of Baindur and on the Bombay frontier.

Here the undergrowth is disappearing rapidly. I will quote from my inspection notes "I went precisely where I had gone in 1927. The first impression is: "the forest looks just as it did at my last visit". Getting further inside however the ground within the forest is seen to be spread about liberally with twigs and small branch material from the cutting of the smaller shrubby tree growth. Very few of the tops of the actual trees are cut. These "trees" are 12 year old coppice ~~xx~~ regrowth from simple coppice fellings of about 1919. To the leaf manure collector they

40

they are not big enough to be worth climbing, for lopping the cutting is therefore done at ground level. I saw numerous Xylia poles cut evidently for roofing purposes. I came to a stand still at one point, where cutting seemed very bad, and counted round me within an arbitrary ten yards radius the stumps of small trees that had been hacked down: there were 12. I determined to go on 50 yards and count again. I did so and the count gave 11 instances." All the cutting there has been done

16. Technical objections to the concessions.

Removal of leaf litter. All countries have gone through stages in which the country people have insisted on being given it: the forests have naturally deteriorated until the deterioration became evident.

17. The removal of undergrowth, young tree growth and shrubs is against nature and must clearly be adverse to the forest. The latter is generally deciduous, and the exposure of the soil to direct sun rays, when the leaves of the forest trees have fallen in the hot weather, causes the soil to be baked and dried up. Even the shade of leafless shrubs makes a difference. Ground vegetation affects underground water conservation. Moreover, in the monsoon, shrubs hold the soil together and do as much to prevent erosion as the forest trees.

18. About part of Mandakole Reserve in South Mangalore I wrote as follows: "The abuses of concession in this village neighbourhood had evidently been bad in 1930. This can be seen from the state of specially the Terminalia and Nux vomica trees. In 1931, however, the District Forest Officer had an interview with the villagers; and they promised to mend their ways. It is evident that abuses have abated greatly."

19. About Virakhamba Reserve (South Mangalore) I wrote:- "This consists of small hilly blocks, well away from our main groups of reserves farther from the coast. The Reserve is surrounded by cultivation, which uses leaf manure. Nux vomica leaves for cocoanut manuring: dry leaf fall litter for the paddy flats: cut leaf manure mainly Terminalia tomentosa and

Nux vomica for the stable bedding, and then for general manuring purposes.

All efforts to promote a Panchayat have failed, because richman and poorman alike, each thinking for his own hand, believe they get more out of it by the present confused administration.

Past records show that lopping Terminalias for leaf manure is an old practice: offences occurred before the concessions as they occur now - ten since Christmas - but the people have now a legal footing: so they can cut more freely

Secondly, unreserves "out in the blue" near these blocks, do not now give as much Terminalia and Nux vomica leaf as they used to: so there is more pressure on Reserves.

This Virakhamba forest is now a forest of pollards, reserved and classified trees are the main sufferers, because it happens their leaves are preferred. The local Forest Guard cannot keep any control. (He appears to be a useless fellow: but a better man would fail too.)

Dry leaf is removed freely (we saw huge heaps down on the paddy flats in the enclosure village.)

Fuel is stolen, to some extent."

20. General remarks. The reserves most concerned with concessions are of value now for production of fuel (in fact they are fuel coupe series), and for all the other normal functions of reserved forest.

21. Forest protection is seldom easy anywhere: and the state of things in South Kanara is setting up awkward precedents. I have yet to hear the train of argument that shows why South Kanara is due special free leaf manure from reserves. Yet we give it free.

22. The concessions are not necessary, generally. If concessions are to stop, we can easily set to work and make special plans for those particular places that must be provided with leaf manure from reserves.

Memorandum No.1870-I/32-2, dated 7-9-1932.

ENCLOSURES.

No. ....  
Spare copies .....

No. D.Dis. 3370-33.

Station Mangalore , Dated the 20th September 19 32.

From (Name) Khan Bahadur J. Hussain, Bar-at-Law,  
(Designation) Collector of South Kanara.

To The Secretary to the Government of Madras,  
Development Department,  
Madras.

The present is not an appropriate time for the withdrawal of the concessions. Beginning from next year, they may be withdrawn gradually by degrees, commencing with the six much abused reserves in North Mangalore Division and Veerakamba Reserve Forest in South Mangalore Division. There is bound to be a hue and cry when these concessions are withdrawn. I would suggest that the ryots who will be affected by the withdrawal be notified of the proposal at least four months' ahead by beat of tom tom and publication in the gazette so that they may not make a grievance that the proposal took them by surprise. I return the enclosure

Working Plans - North and South Mangalore - Prescriptions  
Closure of Reserved Forests to concessions - recommended  
for approval.

ENCLOSURES.

No.

Ref. No. 8743/32.C1.

Spare copies

Station Madras

Dated the 6th October

1932.

From (Name) R.D. Richmond Esq., C.I.E., I.F.S.,

(Designation) Chief Conservator of Forests.

To The Secretary to the

Development Department.

Sir,

In connection with the preparation of working plans for the North and South Mangalore divisions the question of the closure of areas under regeneration and required for the production of wood, to the "concessions", last referred to in Government Memorandum No. 1870/I/32-3, of the 30th September 1932, has arisen.

2. That the unrestricted and continual lopping of trees must affect the production of wood and ultimately result in the death of the trees will be evident. In framing prescriptions for the areas dedicated to timber and fuel

production, the Working Plans Officer has suggested a compromise in laying down that areas should be closed to the concessions for a certain number of years after work. But while this may be given a trial in the case of the timber working circles, which in any case are not so vulnerable as other areas in that they are more remote from centres of manure leaf consumption, the prescription will be ineffective if applied to the fuel forests which lie nearer the more thickly inhabited country and which must be worked on a short rotation. If the utility of the areas is to be maintained, and they are required for the production of wood, both for local use and for the supply of Mangalore, they must be closed altogether to the exercise of the concession. In fact a decision must now be taken as to what purpose the forests are to serve; they cannot serve both.

Similarly it is clear that sandal cannot be grown if it is liable to be cut back every year.

3. In South Mangalore the area to be devoted to fuel production is 4,336 acres (in four Reserves) from which 2,150 tons of fuel, 6,700 c.ft. of timber and a revenue of a little over Rs 2,000 will be obtained annually.

In North Mangalore the figures are 19,139 acres (in eighteen Reserves); 11,300 tons and Rs 14,400.

Also in North Mangalore, 4,438 acres (in six Reserve) have been set aside for sandalwood work.

4. If the concessions in these areas are to continue indefinitely there will not only be loss of revenue; but, what is of greater importance, the loss of a considerable amount of material which is required by the people of the district.

5. The approval of Government is therefore sought to close each course to the concessions as it is worked over and thereafter to keep it closed permanently. The effect of this will be that it will be, unless the concessions are generally

withdrawn in the meantime, forty years before the whole of the 23,475 acres is closed, the area closed being increased by a little under six hundred acres a year.

6. It is also requested that the 4,438 acres of the sandalwood working circle may be closed to the concessions permanently and at once.

7. The working plans will provide for timber areas under regeneration being closed for five or six years.

O.M.No.1870-I/32-4, dated 26-10-32.  
-----Subject: Forests - South Kanara -  
Concessions - Withdrawal.  
C.C's Ref.No.8743/32-C,  
dated 6-10-1932

H.45-47 C. F.

The Chief Conservator of Forests

is informed that, beginning from next

year, the concessions may be gradually

withdrawn. The six ~~mentioned~~ <sup>mentioned</sup>

reserves in North Mangalore and the

~~Veerakamba~~  
~~Veerambakkam~~ Reserve in South Mangalore

may as a beginning be closed. As it

is desirable that the people in the

locality should be given reasonable

warning of the intended closure of the

reserves, the C.C. is requested to

notify immediately to the people

affected the proposed withdrawal of

the concessions by beat of tom tom in

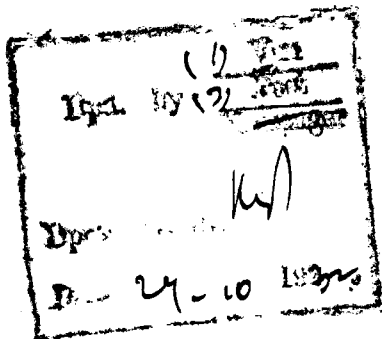

the villages and by publication in the

district gazette and report some time

in March next on any representations

that may have been made against the

withdrawal.

Cuo. 1870-1/32

Forest Concessions - South Kanara

It - discontinuance

To A.S.

Please see the C.C.'s letter  
on pages 1-3 C.F.

The following concessions have  
been granted by the Forest Dept. to  
the people of South Kanara -

(1) Permission to clear undergrowth  
in all reserves (except those  
near the ~~east~~ coast) to a  
distance of half a mile  
from the limits of private  
holdings;

(2) in the reserves near the coast  
the clearing of undergrowth to  
a distance of 200 yards from  
the limits of private holdings;

(3) clearing of undergrowth in all  
areas shown with Hopea;

(4) the free removal of (a) unclassified  
species and dry leaves of all  
species and (b) dead fuel.

The grant of the above concessions  
was the outcome of a conference at

A'ar 1-76, &  
No. 1189 Ser  
10-6-30

(K)

~~take place between the two officers~~

~~presence~~ of some prominent members

of the district and the revenue and

16-7-76 (K)

forest officer at Mangalore. These

concessions have been in existence

since 1922.

In connection with a memorandum

~~regarding~~ of forest grievances in South

Kanara, submitted by Mr. Karant, the

Chief Conservator recommended <sup>(in Jan 1930)</sup> that

these concessions should be withdrawn.

para 15 on 7-9-27 (K)

The Collector of South Kanara was also

para 20 on 7-9-27 (K)

in agreement with the C. C. A - a

remedy against the inconveniences

that would be caused by the withdrawal

para 10 on 1-9-27

9-7-9-27 (K)

of the concessions. He suggested

that he would constitute panchayats

in the forest village system for the

17 areas and provide for such

paying and leaf and litter as they

offered. He had also stated that in

the case of such panchayats the use

of species prohibited from cutting

would be reduced from 34 to 12.

The Govt. however considered that

the withdrawal of the concessions would

vide notes on 7

16-1-27 (K)

lead to much agitation by the

public and advised that the concessions

\* vide A/c on 7-18-27

9 (K)

HR 2-183 (K)

should continue without modification. The C. C. H. stated that the continuance of the Concessions was a serious handicap to the formation of ranches and asked for orders as to whether the Concessions were to be permanent or might be withdrawn if ~~abused~~ abused. In reply he

On an 184 (K)

was told that the formation of new ranches was subject to the continuance of the Concessions and that he might report to the Gov cases of abuses of the Concessions when they are sufficiently serious to require a reconsideration of the orders of Gov.

The C. C. now submit the report on the working of the Concessions during the years 1830 & 1831.

also HR 2-184

It is stated that in 1831, in the North Mangrove division, the Concessions were ~~abused~~ much abused in 13 reserves. In South Mangrove the Concessions are said to have been much abused in one case and to a fairly large extent in nine cases. The C. C.

para 7 on p 20 B

considers that the Concessions in respect of the above 23 reserves should

be withdrawn; but in view of the  
present political situation, he recommended  
~~that they may be withdrawn~~ that  
for the present, the concessions in  
North Mangalore may be withdrawn in  
the case of the six 'much'-abused reserves  
which lie farthest from the sea - and  
that the Veeracuba reserve in South  
Mangalore may be closed to the concessions

P 3 e - 10

It is submitted that the  
considerations which <sup>led</sup> ~~led~~ to the  
Continued <sup>in 1930</sup> ~~in 1930~~  
continuance of the Concessions Bill  
hold good. Further, the C.C. has not  
suggested any remedy for the inconvenience  
that would be caused to the public by  
the withdrawal of the concessions. Probably  
he is of opinion that the constitution  
of Panchayats on the lines suggested  
by him would meet the case. But  
the Dept. does not seem to have been

so far successful in their attempt  
to form panchayats. The no. of panchayats  
had been gradually going down and  
the Dept. have in their adv. No. 359, bar (R)

Because, while  
the concessions continue  
there is no incentive  
to form panchayats  
any

of 10-3-32, revised some of the  
objectionable clauses in the specimens  
taken from the panchayats and asked  
the C.C. to try to form new panchayats.

has been<sup>2</sup> able to form any new panels,  
after the issuing of No. 359 Rev.  
10-3-1932. It does not seem  
advisable to abolish the ~~Concessions~~  
without finding a suitable remedy  
for the inconvenience of the ryots. The  
C. C. may therefore be asked to set  
himself the best chance of success  
in its attempt to form new panels.  
If it is not possible to  
form any new panels, he may be  
asked to suggest a ~~method to overcome~~  
to state how he proposes to remove  
the <sup>inconveniences</sup> of the ryots in case  
the Govt. approve his proposals to  
abolish the ~~Concessions~~. Subject  
to ~~order~~ draft Order is submitted  
for approval.

It is clear that the interests of  
Forest Conservancy require reconsideration  
of the orders regarding the continuance of  
the concessions which, though granted pri-  
marily to minimize the difficulties and inconveni-  
ences of the ryots living in the vicinity of forests  
it was hoped, would be availed of without undue  
detriment to the forests. This hope now seems

to have been falsified by what has actually happened. The ryots seem bent on enjoying the concessions without regard to their effect on the state of forests nor even to their own needs. There has been abuse and the department feels concerned about the future of the forests. The issue thus brought about is how best the forests could be protected and the ryots' reasonable requirements met. To a certain extent the interests of both are conflicting and the lesser of the two evils has to be preferred. If by the withdrawal of the concessions, the hardships of the ryots are likely to increase and no alternative is possible to alleviate them, the concessions may have to be continued, though such of them as have been grossly abused may have to be completely or for a time suspended.

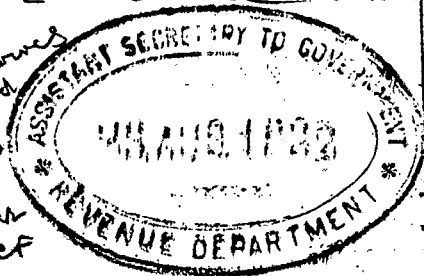

The orders for the revival of the Forest Village system were issued only in March and we cannot expect that much headway could have been made, if regard be had to the indifference of the people to the formation of these panchayats.

The gradual withdrawal of the concerns  
 advocated by the C.C. and Co. agreed <sup>to</sup> will  
 be provided that if proper panchayats  
 are formed. concerns which re-  
 introduced in their responsibility.  
 Rev. in a sec I think it Collect

His proposals are that an area  
of 23,475 acres of reserved forest in South  
and North Kangleue, which

are is required for the production of  
fuel both for local use and for the

Supply of Kangleue should be closed  
gradually and  
to the Concessions permanently. He suggests

that each coupe should be closed

as soon as it is worked up and

the coupe permanently closed to  
the Concession. The whole area will under

the Scheme now proposed be closed

Plan 5 on p. 46 et.

in about forty years, the  
area closed each year  
being nearly 600-1 acres.

The CC has also  
proposed that the 4438-  
acres in North Mangalore  
which have been set aside  
for sandalwood should be  
closed at once permanently.

If the above pro-  
posal will be approved  
the spots affected by the  
closure may be only notified  
as suggested by the Coll.  
on page 42 C-7.

Ref. No. 8743/C1.32

Station Madras, Dated the 29th November 1932

From (Name) A. Wimbush Esq., I.F.S.,  
(Designation) Chief Conservator of Forests.

To The Secretary to the Government of Madras,

Development Department.

Sir,

Ref: Government Memorandum No. 1870-I/32-4  
dated 26-10-1932.

In para 7 of this office Ref.No. 2537/31.01, dated

5-8-1932 it was recommended that for the time being the

concessions in North Mangalore be withdrawn in the case of  
the six "much" abused Reserves lying farthest from the seaand in the case of the Veeracamba Reserved Forest in South  
Mangalore. Again in para 3 of this office Ref.No.8743/32.C1

dated 6-10-1932 it was recommended that in North Mangalore

eighteen fuel Reserves and six sandalwood Reserves and inSouth Mangalore four fuel Reserves be closed to the concessi

In the Memorandum under reference Government have quoted

the second reference of this office referred to above and ordered that the concessions might be withdrawn gradually from next year, and that to start with, the six Reserves in North Mangalore and the Veeracamba Reserve in South Mangalore might be closed to the concessions. A reference to Veeracamba Reserved Forest in the South Mangalore division leads one to the conclusion that Government have considered both references from this office, quoted above, though in their Memorandum, dated 26-10-1932, only one has been quoted

1512 (A)

2. As the orders of Government are ~~xxxx~~ not thus clear it is requested that they be made more definite on the following points:

(i) Whether the Government's intention is that the concessions should be withdrawn gradually in respect of all the Reserves in which they are being exercised in both the divisions or only in respect of the sandalwood Reserves of North Mangalore and the fuel Reserves of both the divisions as recommended in the second reference mentioned above.

(ii) Whether the six Reserves mentioned in the Government memorandum are the six much abused Reserves situated farthest from the sea (referred to in the first reference or the six sandalwood Reserves (referred to in the second reference). The closure of the six sandalwood Reserves to the concessions is also a matter of necessity and urgency as already stated in para 6 of the second reference.

2765-D/32

Letter from the C.C. 7.208743/C. 8.29-4.32

To A.I.

Please see the C.C.'s letter  
in the Cf. He requests definite  
orders on the following points:-

He requests to be informed whether  
is the intention of Govt. that the  
concessions should be withdrawn  
gradually in respect of all the resins  
or only in respect of the sandalwood  
resins of North Bangalore and the  
fuel resins of both the divisions

(A) as recommended by him in his  
letter no 8743/32. C. 8. 6.10.32. This  
question has been asked on pages

(A) 62-63 of No. 20 1426 on 8.2.11.32. It is  
with the intention that the  
concessions should be withdrawn  
in respect of all resins but only  
in respect of the sandalwood resins  
of North Bangalore and the fuel  
resins of both the divisions  
gradually as suggested by him

has been some  
question as to the  
intention of the Govt.  
as to how far  
63 go - (A)

2.9.32

accordingly

3

The second sentence in our  
20:1870 ~~pp~~ 2-48 26-20-32 refers to the closure of  
six reserves in north mangalore. p 51 of 20 1426  
2 para 2 (11) of his letter of 2-11-32  
the C.C. 7 wishes to be informed  
whether the six reserves referred  
to are the six 'much' abused  
reserves situated further from the  
sea or the six sandalwood  
reserves referred to in para 3 and 6 of  
his letter on pages 48-49 of Ex. 20 (A)  
1426 dated 2-11-32. He also asks  
that the closure of the six sandalwood  
reserves is a matter of necessity and  
urgency. The six reserves mentioned  
in the same on p 51 of (A) refer to the  
six 'much' abused reserves. Please  
see the collector's recommendation  
on pp 43-44 of Ex. 20 1426 dated 2-11-32 (A)  
and the notes on pages 62-63 of Ex. (A)  
Unit. The C.C. 7 also considers that P. M. P. S.  
The sandalwood reserves referred  
to in paras 3 and 6 of his letter on pages  
48-49 of Ex. 20 should not be closed  
urgently. It is for orders whether

the c.c.'s proposal will be accepted.  
It is <sup>not</sup> to be decided at night. It is  
submitted for approval tomorrow.

at 11:30 AM

74 The c.c.'s letter of 11-12-32 was by no means clear. It was  
12-32 not clear whether the reserves - 4 in S. Mangalore  
"Mangalore and 2 in S. Mangalore" were in addition  
to the reserves dealt with in his earlier  
letter (of 11-3-32). A.C.

The question now is whether the c.c.  
should withdraw the reserves from all the  
reserves where they are, and then

whether they should make a beginning  
with a few reserves and if so which of them  
should be closed as a beginning.

The collector was against the closure of  
all reserves simultaneously. He wanted that the  
reserves should be withdrawn gradually, beginning  
from the reserves which had been much abused.  
He did not see the second letter of the c.c. This  
second letter does not refer to all the reserves where  
the reserves are in force but only

(1) to 18 (incl. reserves in N. Mangalore  
(2) to 6 (incl. Sandalwood reserves in N. Mangalore  
(3) to 4 (incl. reserves in S. Mangalore).  
The c.c. is of opinion that these reserves which

are worked in accordance with working plans  
should be specially pointed out each <sup>camp</sup> ~~camp~~ in them  
is worked over. These reserves are in addition  
to those which the C. K. K. recommended might

For: and whether that should be done

P. A. S.

Please see the ss above. There  
was a legislative Council, on the  
subject and some reference was  
made to it in the Council during the  
budget discussions. As no representation  
have been made to the D.F.O. concerned

apparently there is not much agitation among the people immediately affected by the withdrawal of the concessions. Further the suggested withdrawal is because of the abuse of the Concessions. In the circumstances it is for orders whether the C.C.F. may be informed that the Concessions may be withdrawn with effect from 1.4.33. If so, the draft below is for approval.

tsl.  
2.3.33.

Copy of the Chief Conservator's proceedings No. Ms. 560  
dated the 17th December 1932.

Forest concessions - South Kanara - Withdrawal -  
orders passed.  
--

After repeated requests the Government have eventually agreed to the gradual withdrawal of the special concessions in South Kanara beginning from next year and have ordered that the following reserves should be closed to the concessions to start with:-

(1) Six of the much abused Reserves of the Coondapur Range of North Mangalore which lie farthest from the sea. [The much abused reserves referred to comprise items 1 to 6, 8 to 11, 13 and 15 in the statement submitted with the office note of the District Forest Officer, North Mangalore, Ref. on C.No. 2630. F.31 c.1., dated 23-1-32].

(ii) The following six sandalwood reserves in the North Mangalore division

- |              |                  |
|--------------|------------------|
| (1) Hosabett | (iv) Vorwady     |
| (ii) Todar   | (v) Mavinguly    |
| (iii) Nire   | (vi) Kassankatti |

(iii) The Veeracumba reserved forest in South Mangalore. As it is desirable that the people in the locality should be given reasonable warning of the intended closure of the reserves, the District Forest Officers concerned should notify immediately to the people affected the proposed withdrawal of the concessions by beat of tom tom in the villages and by publication in the district gazette. The concessions should be withdrawn from April 1st 1933 after issuing the preliminary warning and notification.

2. The District Forest Officers are requested to submit reports on any representations that may be made against the withdrawal through the Collector and Conservator not later than March 1st 1933.

3. The Conservator is requested to report the names of the six much abused reserves in the North Mangalore division which lie farthest from the sea referred to above. These should exclude the Nire Reserved Forest which will be closed to the concessions as a sandalwood reserve.
